Management solution for the construction industry

smartbuild by ROFF is an innovative multipurpose tool for all the functional areas of engineering/construction companies. It helps management stay informed and monitors the possible changes that occur on a daily basis.

A solution based on SAP best business practices will make it possible to implement a fully integrated user-friendly IT system.

Current challenges in the engineering/construction

Companies in the engineering/construction sector currently face various challenges:

- | High-risk capital-intensive projects;
- | Projects with long life cycles;
- | Low profit margins;
- | Minimal margins of error;
- | Heterogeneous markets with varied legal requirements.

smartbuild by ROFF combines the advantages of an integrated flexible system. It allows constant, immediate remote access to information and provides more detailed knowledge of the processes of engineering, procurement, construction, operations, project management and materials.
